### SUMMARY

Studied software development, programming, database management, web development, and system analysis. Developed academic projects focused on building practical and user-friendly applications while strengthening problem-solving and technical skills.

### WORK EXPERIENCE

#### IT Support Internship

Nov 2025 – Feb 2026

- Assisted in setting up and maintaining computer systems within the school
- Provided technical support to students and staff for IT-related concerns
- Helped in setting up audio and sound systems for school events
- Performed basic troubleshooting and resolved hardware and software issues

### PROJECTS

#### VibeMovies | Web Application

- Designed and developed a responsive full-stack movie tracking application utilizing React.js, Tailwind CSS, and Firebase (Authentication & Cloud Firestore) to manage user profiles and custom watchlists.
- Integrated external REST APIs (TMDB) to fetch and parse real-time data, while optimizing application stability and routing using React Router DOM.

#### Cashier Hub & Employee Payroll System | Web Application

- Engineered a centralized dashboard using React and Tailwind CSS to streamline employee data management, cutoff creation, and real-time attendance tracking.
- Developed an automated compensation system that processes overtime and tardiness deductions to dynamically calculate net pay and generate printable payslips.

#### TagAlert Quick Response | Mobile Application

- Built an incident reporting app using Flutterflow and Dart to improve community-to-official communication.
- Integrated real-time reporting and notification features for faster emergency response.

#### Store Price Searcher | Mobile Application

- Engineered a mobile application using Dart to help store owners manage inventory and price lists.
- Implemented search functionality for quick price lookup and CRUD features for product storage.

### EDUCATION

#### Bachelor of Science in Computer Science

Sept 2022 – Mar 2026

Colegio de San Pascual Baylon

- Learned web development, programming, and database management through academic projects and system development.

### KEY SKILLS

- |                         |                          |                          |
|-------------------------|--------------------------|--------------------------|
| • HTML, CSS, JavaScript | • Dart, Flutterflow      | • Full-Stack Development |
| • React, Tailwind CSS   | • Git, Github            | • Debugging              |
| • Firebase              | • MySQL/XAMPP            | • Problem Solving        |
| • Java, PHP, Python     | • VSCode, Android Studio | • Team Collaboration     |
